

# CHATEAU POTENSAC 2020

## AOC

Médoc

## TERROIR

The vineyard of Château Potensac extends mainly over limestone subsoil covered with clay-gravel hillocks with a high proportion of gravel. These limestones are very similar to those found in the Saint-Estèphe appellation. This singular terroir has plots of Cabernet Sauvignon and Cabernet Franc planted over 80 years ago, producing perfectly ripe and healthy grapes. The first edition of Féret already mentioned the hamlet of Potensac for the typicity and longevity of its wines.

## VINTAGE 2020

A complicated vintage from start to finish: early, wet and then dry, the vines of this splendid terroir required constant work to convert these delicate conditions into extra soul. The harvest was of high quality, even if not very abundant, offering an exceptional maturity of tannins and minerality. The Grand Vin du Château Potensac stands forward with aplomb, with a masterful concentration, mineral tension and freshness of ripe black fruits. Certainly one of the most persistent ever produced at this stage.
