

Jada Vineyard and Winery

United States - California

Jada Vineyard lies in a incredible pocket of the Templeton Gap/Willow Creek District, blessed with cooling coastal air and abundant sunshine throughout the growing season. With sustainability and minimizing their environmental footprint a focus of their winegrowing program, Jada has embraced organic and biodynamic farming techniques and last year, received a SWEEP grant from the CDFA for their commitment to sustainability.

To their winemaker, Josh Harp, the beauty of the land here is found beneath the surface and it's the reason the Messina Family, back in 1999, purchased this 95 acre hillside estate on the West-side of Paso Robles. Under a shallow topsoil of clay loam lie massive deposits of calcareous shale and pockets of limestone. This challenging environment contributes to reduced vigor in the vines and decreased berry size, which plays a huge part in the intensity of their fruit and imparts a complex underlying minerality to their wines. Harvest at Jada generally begins near the end of September and the beginning of October allowing for a long maturation process that results in superb development of color & intensity in character while maintaining acidity.

Jada's approach has always been one of "sustainable excellence" - avoiding short-cuts and focusing on those improvements that would increase wine quality year after year. They are proud today to celebrate their 13th vintage making estate wines, their 95th "90/+" wine rating, and their 11th anniversary, since opening the Tasting Room doors in 2008.

Currently, the ranch is planted to 48 acres of Rhone and Bordeaux varietals, making under 5,000 cases to support the Wine Club and Tasting Room. All you have to do to be a part of this amazing effort is sit back, relax, sip, and enjoy!

Founded

1999

Wine Production Area

United States - California - Paso Robles

Owners

Jack Messina

Winemaker

Joshua Harp

Grape Varietals

Syrah, Grenache, Graciano, Cabernet Sauvignon, Tannat, Viognier, Petite Sirah, Merlot, Petit Verdot

Agricultural Methods

Sustainable
