Nebbiolo is a native black grape variety of Piedmont that gives birth also Barolo and Barbaresco. The name 'Nebbiolo' derives from the word 'fog' and there could be two reasons. The first hypothesis traces the name of Nebbiolo back to the obscured, almost clouded appearance of the grape, covered with abundant bloom. The second hypothesis, more suggestive, is linked to the very late ripening of the grapes: the Nebbiolo grape harvest often takes place in late October, when the vineyards are enveloped in morning mists.
