

The Black Square Cabernet Sauvignon

Holocene Wines

United States - Oregon - The Rocks District of Milton-Freewater

There is something ethereal about Cabernet Sauvignon grown in the cobblestone soils of the Walla Walla Valley.

Aromatic exuberance, elegance, finesse, a gracious and polished texture, layered complexity, and never-ending length. It is an area where you can craft a singular, stand-alone example of this varietal, unique in the United States -- or anywhere -- yet contains echoes of some of our favorite wines grown and produced in Bordeaux. Produced for the first time in 2022, the Black Square is 100% Cabernet Sauvignon grown in the Rocks District of Milton Freewater, Oregon, inside the Walla Walla Valley.

We had envisioned a wine that would have elegance and grace but be framed with great structure, supple texture and acidity to help it go the distance. This is a totally unique expression of Cabernet. It is more fruit-forward with a luscious savory backbone; it is undeniably Cabernet first and foremost.
